

Shashank Mende

Recent graduate with a strong foundation in both front-end and back-end development. Proficient in HTML, CSS, JavaScript, and familiar with frameworks like React JS and Node JS. Completed multiple projects, including a full-fledged Full-Stack websites. Seeking challenging developer position to utilize my skills in coding and problem-solving in a dynamic tech environment.

Consistency, Loyalty, Dedication

PERSONAL PROJECTS

Hospital Management Application

- Developed a **full-stack** web application for managing patient enrollment and records for a hospital. The application allows efficient patient data collection and provides an easy-to-navigate interface for hospital staff. Responsibilities: Designed and implemented a patient enrollment form using HTML, CSS, and JavaScript, **React JS** to collect patient details. Built a back-end server with **Node.js** and **Express.js** to handle form submissions and interact with the **MongoDB** database. Created and managed the MongoDB database to store patient information securely. Developed a dynamic patient list page featuring a search bar to filter patients by name, enhancing user experience and data accessibility. Implemented a hamburger menu for intuitive navigation between the patient enrollment form and the patient list page.

Backend API for Recipe Sharing Platform

- Developed a robust backend API for a recipe sharing platform, enabling users to perform CRUD operations on recipes. **Responsibilities:** Created RESTful API endpoints to facilitate CRUD operations on recipes and user profiles. Implemented user registration, login, and profile management using JWT for secure authentication. Developed methods for creating, reading, updating, and deleting recipes, incorporating validation and error handling. Designed and implemented schemas for User and Recipe models in MongoDB, and populated the database with sample data. Utilized OOP principles by structuring code into User and Recipe classes, encapsulating database interactions within class methods. Set up API routes for user and recipe operations, and implemented authentication middleware to secure endpoints. Authored a comprehensive README file detailing setup instructions, API usage, and examples of requests and responses. Successfully deployed the API on a cloud platform, providing a live link for testing and evaluation.

E-Commerce Clone

- Developed a cutting-edge e-commerce platform inspired by Amazon and Flipkart. Built pages for Login, Products, and Product details with React Router, React components, form inputs, and event handlers. Enabled secure authentication and authorization with JWT tokens and REST API calls. **Technologies used:** React JS, JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication.
